TRAINING PROGRAMME ON

LEAN MANUFACTURING CONCEPTS

DATE :16-10-2026

VENUE : PRODUCTIVITY HOUSE

TIME: 09.30 AM-4.30 PM

INTRODUCTION

Lean Manufacturing is a management philosophy rooted in the Toyota Production System that focuses on maximizing value and eliminating waste through better workplace management and efficiency, continued improvement and respect for people. Supported by tools such as Value Stream Mapping, Just-in-Time, Kanban, Automation, Quick Changeovers, Poka-Yoke, and Standardized Work, Lean empowers organizations to streamline processes and enhance customer satisfaction. Among these, 5S—which builds an organized, safe, and disciplined workplace—and Kaizen—which drives continuous, employee-led improvements—are especially critical, as they create the cultural foundation for sustained productivity, quality, and competitiveness in today's manufacturing landscape.
